It may happen that the equipment contains the license restrictions of other proprietary licenses that do not normally accompany the operating system. Such a combination may prevent you from installing the GNU Library together with an executable binary program. However, parties who have received copies of rights from the Library will not have their licenses terminated as long as such parties remain in full compliance.

You may place binary libraries that are a work based on the Library side-by-side in a single binary together with other libraries not covered by the License, and distribute such a combined binary provided the separate distribution of the work based on the Library and of the other library libraries is permitted, and provided that you do not have to keep.

Accompany the combined binary with a copy of the same work based on the Library, unchanged with any other library facilities. This must be distributed under the terms of the Sections above.

As a consequence of a court judgment or arbitration proceeding or for any other reason not limited to patent claims, the recipient exercises of the rights granted here. You may not be responsible for enforcing compliance with the terms and conditions of the recipient's exercise of the rights granted here.

It is not the purpose of this license to restrict your freedom to improve the software. You may not charge a fee for the software, but you may charge a fee for the distribution of the software. You may not charge a fee for the software, but you may charge a fee for the distribution of the software.
