High efficiency for installing new IP cameras without switching working analog system

Security integrators and installers were having to adapt to project demands and customer demands as well as having to manage multiple technology solutions. Some customers request to keep their old existing analog cameras but they want to install new network camera with high-definition video technologies. That's why pentabrid DVR should be needed. Pentabrid DVR offers flexibility to integrators and installers, are able to meet demands of certain project or customers

Up to 4K resolution monitoring (HDMI) and dual monitor

Wisenet Pentabrid DVRs provide high resolution up to 4K. It also offers various layouts including dual monitor using HDMI and VGA so that users can select and view desired areas.

Dual recording for efficient monitoring

Images are compressed and stored in both low and high resolutions simultaneously to enable multi-channel monitoring depending on the circumstances. This is especially effective in mobile and remote monitoring and it helps speeding up the search time.

User friendly UI

Wisenet pentabrid DVR lineups have more intuitive UI design to be more convenient. Pentabrid DVR's enhanced new UI same with Wisenet NVR's UI for more convenience. Operators select camera icon from tree then drag and drop for viewing. And upgraded installation wizards offers more simpler configuration.

Easy connection with P2P service (QR code)

User can monitor camera images with installing free application, Wisenet Mobile with only scanning product's QR code without complicated network setting. And a push notification of event from Wisenet Mobile helps operator for an accurate response.
